1 List of Definitions and Abbreviations

- MOA - Municipality of Anchorage

2 Introduction

The bsdInspect web application provides Inspection Requests submission.

3 Questions

Still have some outstanding questions.

- - Break table column over two rows?

4 Examples

Series of useful L^AT_EX markup. Need to break out to separate examples.tex file.

4.1 Escaping < and > Symbols

To get \$<\$ or \$>\$ just wrap the symbols in \$ for math mode.

4.2 Enumerate

1. DNR - Alaska State Department of Natural Resources
 - HI - Historical Index, not maintained since 1982
 - LE - Land Estate, maintained by SGU
 - ME - Mineral Estate, maintaind by SGU
2. Alaska State Surveys
 - ASBLT - As-Built Survey
 - ASCS - Cadastral Survey

4.3 Comments

COMMENTS Comment — *Sean Weems, Spring 2003*

We should get the **COMMENTS** column searchable via the landrecords application before we do much anything else – shouldn't be too hard.

Errata: Plats spanning multiple sections

A few anomalies can be observed in the **AKPLATS** table. Specifically plats exist that span multiple sections. Since the table only has a single column, **SCODE**, that accepts a single section code, SGU (Status Graphics Unit) has handled this problem by entering multiple rows in the table, each with a different section that point to the same plat or file. Multiple section plats are indicated by setting the **TCODE** column to the value 37, and making an appropriate notation like *Section 24-25-26-27* in the **REMARKS** column.

[FIXME: Perhaps the **SCODE** column should accept an array of sections?]

4.4 Footnotes

Some footnotes here ?? for an example. Yet another 2 example.

4.6 Verbatim

“The verbatim environment is a paragraph-making environment that gets \LaTeX to print exactly what you type in. It turns \LaTeX into a typewriter with carriage returns and blanks having the same effect that they would on a typewriter.”¹

```
\begin{verbatim}
  text
\end{verbatim}
```

[FIXME: Need to determine how to escape the verbatim markup for display above.]
